ABSTRACT

This is a catalog of individualized learning activities packages (LAPs). A LAP is a 4" x 6" microfiche containing a maximum of 60 pages. Generally, each LAP contains two sections: (1) a section for teachers including learning objectives, suggestions for materials and activities, and test answer keys; and (2) a student section including a list of instructional activities and examples of tests to measure competence gained in the activities. Each LAP deals with a single learning area. This catalog is arranged to provide the user with subject areas and grade levels for each LAP. A LAP order form is appended. (MM)

ORDER FORM

ERRATA/APOLOGIA

We wish to draw your attention to a pricing error that occurs in the LAP Catalog. The price per fiche must now be figured at $0.25 per fiche card and not at $0.20 as reported herein. The price increase is necessary due to the increased cost of microfiche which contains petroleum products. We need not dwell on what has happened recently to petroleum prices except to say that our per unit price increase is directly related.

WHAT'S A LAP

A LAP (sometimes called a UNIPAC) is a compact, often single concept, individualized learning package complete with pre- and post- tests. Around 5600 of these "instant lesson plans" are currently in the E.R.C. collection. In format, a LAP is a 4" x 6" piece of microfiche (My-crow-feesh) containing a maximum of 60 pages. Generally, each LAP contains a teacher section noting objectives, materials, activities and test answer keys, and a student section composed of a list of activities and tests to measure competence gained. The LAPs deal with a single learning activity such as "developing the main idea in a paragraph" to "oxygen-acetylene welding." The catalog is arranged so as to provide the user with subject areas and grade levels for each LAP. Because of heavy request levels, LAPs are available in microfiche format at a cost of $0.20 per fiche. Users will need a reader, and preferably, a reader-printer to utilize this resource to its utmost.

Entry No. 00724 "LAP over LAP," provides educators with background information on the idea of the learning activity packet and gives instructions for the construction of such packets. Entry No. 730124, listed in the Supplement ("In-Service Education") provides similar information on LAP development.

In an effort to centralize LAPs for more efficient and effective dissemination to the classroom teacher, the Educational Resources Center has a standing policy that it will send on to any teacher or administrator, six LAPs for every one sent in to the Center. This catalog can be used for making selections by those who choose to establish a six-for-one account with the Center.

Requests for LAP Catalogs and/or LAPs should be made to the Educational Resources Center, 800 Dixwell Avenue, New Haven, Connecticut 06511. Interested out-of-state educators should contact Harry Osgood, Director of the Educational Resources Center.
